

Where ancient wisdom meets modern technology

For Immediate Release

ASPEdit 2000 Active Server Pages, VBScript and HTML Editor.

The Cambridge (United Kingdom) based software company Tashcom Software has re-released ASPEdit 2000 for Windows, a feature rich Active Server Pages, scripting and html editor, with full support for all popular scripting languages. Also included are HDML and WML to support the WAP developers.

ASPEdit is an award winning (\*) and powerful Active Server Pages and HTML editor with full support for Visual Basic script. Its code highlighter will provide a clear view on your code, and shows all HTML, ASP, VBScript and other scripts colorized so you immediately can see what is code and what is text. Discover the ease of use ASPEdit provides when you are editing your web pages. Features like link and document validation, open files directly from the internet, a ADO connection wizard, SQL Query wizard are just a few of the many features and wizards incorporated in ASPEdit

ASPEdit also supports the webtv tags, cold fusion and common SQL commands and is able to generate SQL functions via an easy SQL query builder. ASPEdit caters to the beginning web author and for the professionals who know it all, but still need to look up that tag you always seem to forget. ASPEdit is for \*all\* levels of web authoring. It provides easy to use wizards who enable you to work fast and easy, and you can switch them off if so desired.

ASPEdit is designed to run under windows95/98/NT and Win2k. ASPEdit 2000 costs \$50.00 for a single user license (web edition) or \$75.00 for the CD-ROM edition. Site and educational licenses are available.

For more information about ASPEdit contact Tashcom Software on [info@lionhardt.ca](mailto:info@lionhardt.ca), or visit the ASPEdit website at <http://www.lionhardt.ca>

Tashcom has been creating high quality software since 1990, in addition to ASPEdit Tashcom also markets Adkiller, Code Explorer, Mailbutler and other Internet related products.

(\*)ASPEdit was awarded 5 cows at [tu cows.com](http://tu cows.com) and featured as the head of the heard; Dr. Filefinder commended us for creating a powerful and excellent tool.

P.S. You can download an evaluation version online at <http://www.lionhardt.ca>

*NB: Tashcom Software was acquired by Lionhardt Technologies in 2002*
