

Where ancient wisdom meets modern technology

For Immediate Release

Broadcast Builder - News and views, Your way!

Ottawa, ON, February 2005 -- The Ottawa (Canada) based Software Company Lionhardt Technologies has released Broadcast Builder Windows, a feature rich news feed and web logs (Blog) creation tool.

Award winning (*) Broadcast Builder is a powerful tool which allows you to generate news feeds in RSS format. Importing from local or remote resources and exporting to a database are all standard features. As well, the built-in validator assures you that valid RSS is produced.

Broadcast Builder allows you to quickly design feed articles. Blog entries can be designed via a built-in WYSIWYG editor and can be published to either an internal Blog system or to Blogger API compatible servers. The intuitive interface provides easy navigation through the various options.

Broadcast Builder is designed to run under Windows 95/98/NT/2000/2003 & XP. Pricing starts at \$29.95 for the personal edition. The Professional edition at \$49.95 has added features while the Enterprise edition starts at \$129.95, a corporate version, multi user and site licenses are also available.
